## Roadmap for Q1 & Q2 2024

### VanillaFarm

A lot more farms are planned for the next few weeks and months, stay tuned.

### VanillaDAO

Holding the \$VAN Token will open you doors to governance votings and fee reductions for future projects and services in the Vanilla-Eco-System.

### VanillaSwap

The current version of VanillaSwap is a Uniswap v2 fork. The v3 Version fork will be available shortly.

### VAN Token

\$VAN will be listed on a Centralized Exchange (CEX) soon. Contracts are already signed. You will be able to send VAN directly from the DMC to the CEX and back.
